

Medical Information Guide

Research Prototype Only

This seeded asset is for research prototype testing only. It is not medical advice and should not be used.

What People Need To Know

- What the condition or treatment is intended to address.
- What benefits, limitations, and uncertainties are clearly stated.
- What safety information is easy or difficult to understand.

Questions To Watch For

- When would someone contact a clinician?
- What terms need a plain-language explanation?
- What practical barriers could slow action?
